ABOUT

- Self-driven and independent
- Good communication and interpersonal skills
- Multi-tasking skill

EDUCATION

SIM - UNIVERSITY OF WOLLONGONG

Bachelor of Computer Science

Double Major in Big Data & Cyber Security

2024 - 2026

EXPERIENCE

TOPPAN ECQUARIA PTE LTD

Software Engineer Intern

9 Months

Sep 2023 – May 2024

Software Engineer

- Participated in System Integration Testing (SIT) and User Acceptance Testing (UAT) to support software delivery and production readiness.
- Coordinated and followed up across multiple domain tracks.
- Executed MySQL queries for data retrieval, validation, and database patching activities.
- Managed CI/CD build executions using Jenkins to support deployment workflows.
- Performed full system deployments using internal Docker containers and deployment stacks.
- Analyzed and extracted application logs to diagnose system error.
- Participated in troubleshooting.

Quality Assurance

- Conducted functional, regression, and quality assurance testing to validate system stability after feature enhancements and fixes.
- Logged, tracked, and monitored defects using MantisBT.
- Collaborated with developers and QA engineers to reproduce, verify, and resolve reported issues.

Collaboration

- Worked closely with Team Leads, Software Engineers, and QA Engineers to support development and delivery of web-based application systems.
- Participated in client meetings.
- Collaborated with cross-country development teams to coordinate issue resolution and deployment support.

PROJECT

LINKSENTRY

Final Year Project - Web Link Scanner

6 Months

Jan 2026 – Mar 2026

- Mobile application for Android that identifies malicious links through URL & camera-based scanning.

SKILLS

Languages: Effective Bilingual in English, Chinese

IT Languages: HTML, CSS, Markdown, JavaScript, SQL, Python, Java, C#, Dart

Libraries & Frameworks: Bootstrap5, ASP.NET, Flask, Flutter

Database: Microsoft SQL Server, MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Jenkins, MantisBT, Firebase, Postman, Basic Understanding with AWS Cloud Platform

Relevant Coursework: Algorithms & Data Structures, Database Systems, Object-Oriented Programming, Cybersecurity & Ethical Hacking, Artificial Intelligence & Machine Learning, Big Data Management & Mining, Web Application Development with .NET.
